Re: Riverwalk Project

After prioritizing their 2009-2010 FY Budget, the Design Committee has determined that improvements to the Riverwalk should be undertaken. They toured the Riverwalk at their meeting and are interested in putting together a proposal to the Board for improvements that they would be interested in pursuing. Preliminary discussions show a different direction the previous Riverwalk plan which included a complete renovation. The idea would be to improve upon what is existing, get the property owners involved and add some amount of street furniture that would function better than the existing (i.e. trash cans). **Please provide direction as to whether the Board would like to see the Design Committee develop a plan and proposal for improvements to the Riverwalk.**

Thank you.
